LeadPro 24|7 combines lead aggregation and management solution with a back office system for your lead buyers. Used together, they provide you with a robust platform that not only captures, distributes and tracks your leads but allows you your clients to access and retrieve leads online and request credit for lead returns.

How it all Works...

LeadPro24|7 captures the leads from all your lead sources (websites, emails, lead providers and lead gen systems), scrubs and validates the data then immediately routes to your lead buyers based upon your distribution / routing rules.

The system supports exclusive leads as well shared leads. It includes extensive Real Time Lead Alerts that transmits your lead via email, mobile devices, fax and/or text messaging (SMS) helping to ensure that no lead is missed!

Once the lead are delivered, your clients can access the same through their own login into the lead back office system. Lead returns / credit requests also can be handled online.

LeadPro 24|7's robust reporting tool provides you with a real-time snapshot of your leads enabling you to drill down to the smallest of details, allowing you to be more efficient with your time and marketing spend. Generate reports directly in the system or easily download your data to create your own.

LeadPro 24|7 changed the way I do my insurance business. When I first started with them about a year ago I had dozens of clients at the time, it was whelming just to maintain them let alone get new ones. I have increased my customer base thanks to this tool.
